Excel 365-Advanced (FR)

Mr B Candidat

Group: Groupe principal
Score: 55/100
Test date: May 28, 2026

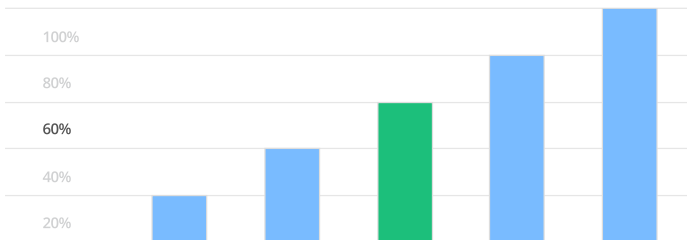

Score: 55/100

Skills Assessment Summary The candidate demonstrates intermediate Excel proficiency with a score of 55/100. Strengths include competency in advanced functions (NB.SI.ENS, JOINDRE.TEXTE), conditional formatting, and pivot table functionality. The candidate successfully handles moderate-difficulty tasks such as sheet protection and form controls, and shows capability with complex chart types like waterfall and pie charts. However, significant gaps exist in several areas. The candidate struggles with advanced functions (SUBTOTAL, IF.CONDITIONS), data manipulation tools (advanced filters, slicers), and environment customization features. Performance on harder-difficulty questions is particularly weak, suggesting limited experience with Excel's more sophisticated capabilities. Foundational knowledge in formatting and data handling requires strengthening.

1 Domains

Environment and Methods

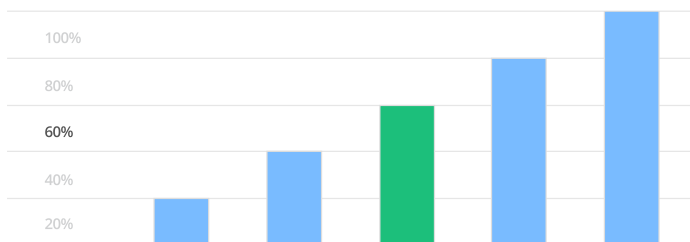

DOMAIN DESCRIPTION:

Questions in this domain cover the Excel software environment: window elements, ribbon customization, the Quick Access Toolbar, etc. It also includes questions related to saving and printing documents in Excel, workbook layout, and protecting documents.

AI ANALYSIS OF ANSWERS

The Environment and Methods domain covers Excel software environment elements, ribbon customization, Quick Access Toolbar, document saving, printing, workbook layout, and document protection. The candidate achieved a 42.86% success rate, demonstrating partial competency. Regarding document protection and form controls, the candidate successfully demonstrated knowledge of inserting form controls and protecting sheets. However, the candidate struggled with advanced customization tasks, unable to add totals to structured tables, customize Sparkline charts, personalize the Quick Access Toolbar, or inspect documents. The candidate shows foundational understanding of protection features but lacks proficiency in environment customization and advanced document inspection capabilities.

Functions

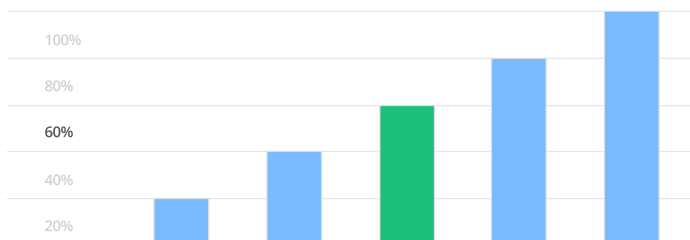

DOMAIN DESCRIPTION:

Questions in this domain cover formulas and functions. They vary from simple formulas (computing a sum, performing a simple test) to complex formulas (database functions, VLOOKUP, INDEX, etc.).

AI ANALYSIS OF ANSWERS

The Functions domain encompasses formulas and functions ranging from simple calculations to complex operations including database functions, VLOOKUP, and INDEX. The candidate achieved a 60% success rate, demonstrating solid competency. Regarding text and conditional functions, the candidate successfully applied JOINDRE.TEXTE and SI.NON.DISP functions, showing understanding of text manipulation and error handling. For counting and conditional logic, the candidate mastered NB.SI.ENS but struggled with SOUS.TOTAL and advanced conditional functions like SI.CONDITIONS and SI.MULTIPLE. The candidate demonstrates strong capability with modern text and error-handling functions while needing improvement with aggregate and complex conditional logic functions.

Formatting

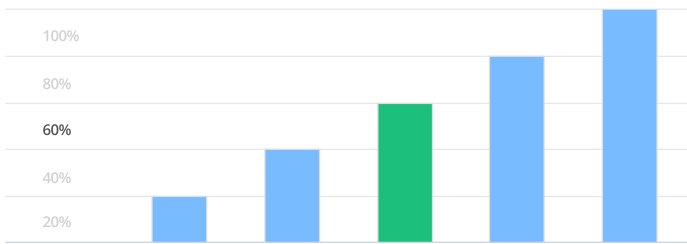

DOMAIN DESCRIPTION:

Questions in this domain cover cell formatting (alignment, font, styles), advanced number formatting (sorting, charts, advanced filters), and conditional formatting. Advanced-level questions and exercises also focus on data formatting.

AI ANALYSIS OF ANSWERS

The Formatting domain covers cell formatting including alignment and fonts, advanced number formatting with sorting and filters, and conditional formatting. The candidate achieved a 50% success rate, showing mixed competency. Regarding chart and sparkline customization, the candidate successfully identified modifiable elements in pie charts but failed to customize Sparkline charts, indicating partial chart knowledge. For data formatting and conditional formatting, the candidate successfully applied data bars conditional formatting and created sheet groups but struggled with structured table totals and the Quick Analysis tool. The candidate demonstrates capability with basic conditional formatting and sheet organization while lacking proficiency in advanced chart customization and structured data totaling.

Data Manipulation

DOMAIN DESCRIPTION:

Questions in this domain cover formatting data in Excel (basic cell formatting, conditional formatting, dates, advanced numeric formats, etc.), charts, and pivot tables.

AI ANALYSIS OF ANSWERS

The Data Manipulation domain covers data formatting, charts, and pivot tables including advanced features and filtering techniques. The candidate achieved a 42.86% success rate, demonstrating partial competency. Regarding pivot table and chart analysis, the candidate successfully utilized advanced pivot table features and identified pie chart modifications, showing strong analytical capability. For data filtering and exploration tools, the candidate struggled with advanced filters, the Segments tool, and the Quick Analysis feature, indicating gaps in data exploration. However, the candidate recognized cascade charts, demonstrating some visualization knowledge. The candidate shows strength in pivot table analysis but needs development in advanced filtering techniques and data exploration tools.
